

PO - Error Message - Built-In Refrigerator

Possible Solution

PO Error Code

Power Outage: The Power Outage indicator lets you know if the power supply to the refrigerator has been off and the freezer temperature has risen to 18°F (-8°C) or higher. The control panel temperature display will read “PO,” and an alert tone will sound three times. “Confirm” will blink until you acknowledge the power outage by pressing MEASURED FILL under “Confirm.” Once the power outage has been confirmed, the “PO” will disappear, and the display will return to the Home screen.
