How to Install the Reversible Shredding Disc

Installing the Reversible Shredding Disc for the KitchenAid Food Processor

1. Insert the liner into the attachment assembly so that the feed tubes line up, and the liner lies flat.

2. Slide the disc adapter onto the drive pin.

3. Hold the reversible shredding disc by the two finger grips with the desired shredding side facing UP. Install the disc on the disc adapter by fitting the adapter through the hole in the bottom of the disc until it is seated against the liner.

4. Install the lid by turning counter-clockwise, being sure it locks into place.
